Know Your Gear

In an era of the ever-evolving security landscape, small- and medium-sized businesses (SMB) face large challenges when it comes to defending their networks, data and reputation. Keeping up with changes in technology can be as difficult as tracking the growing number of threats.

The SonicWall TZ series of firewalls is designed specifically for the needs of SMBs and branch locations, delivering enterprise-class security without the enterprise-grade complexity.

With Zero-Touch Deployment and simplified centralized management, installation and operation is easy. Detect sophisticated threats, including encrypted attacks, with advanced networking and security features, like the multi-engine Capture Advanced Threat Protection (ATP) cloud-based sandbox service with Real-Time Deep Memory Inspection (RTDMI).

Simply plug in and enjoy the advanced protection of the cost-effective SonicWall TZ series firewall without worrying about complex management - or the next threat.
