

Spalding V.F.D. just purchased & put into service a brand new 2017 rescue/ambulance 4 wheel drive.

With money we received from renting our engines to Cal Fire and donations from the public after the Whaleback Fire we were able to purchase our new rescue. We also purchased a new Stryker Electric Guernsey. We have also sold our old Rescue.

Our new rescue should service Spalding Community and surrounding area's for the next 20 years plus.
