#### **SEWER - MAINTENANCE**

David Handy

16 January 2024

On Dec 11-12, 2023, Aqua Sierra worked at Pump Station #1. They installed a new pump in the 10,000-gal sewer tank with piping above ground and connected it into the piping inside the vault. They also ensured that the new pump was connected, put in sequence, and able to be monitored by our SCADA system. The new pump is #1. The other working pump is #3. I wrapped the pipe above ground with heat tape in accordance with all present and ensured that it was working. While they were working in the vault, I had them test our 'gas alert detector'. It functions properly.

On Dec 13, 2023, I discovered that the pumps at PS #1 were not operating properly. Aqua Sierra directed me to adjust the float #2 and #3 up 6 inches on the float tree. This enabled the pumps to operate correctly.

On Dec 17, 2023, at PS #1, I insulated the piping above ground and placed a wood cover over it.

On Dec 18, 2023, I discovered an issue on my SCADA with PS #1. I discovered that the heat tape got too hot. It allowed the piping elbow to become detached, resulting in effluent coming from the community to spill onto the ground instead of going into the 10,000-gal tank. The spill was contained and stopped. I re-glued the piping elbow and unplugged the heating tape. The proper people were notified of the spill. I set up Aqua Sierra and Big Valley Sanitation to arrive the next day to repair and for clean-up.

On Dec 19, 2023, Big Valley Sanitation cleaned up the spill. Aqua Sierra replaced the above piping and put on the correct type of heat tape. They also put in a breather pipe to prevent too much pressure from building up in the pipes. After they insulated the piping, I placed the wood cover over it.

On Dec 27, 2023, there was a power outage for approximately 10 hrs. Monitored and verified that all Generators and SCADA system functioned properly during the entire power outage.

On Jan 4, 2024, I emailed the required information to Tiffany Barulich, Water Resource Control Engineer, a written confirmation and report of the spill and clean-up that occurred Dec, 18-19, 2023.

On Jan 15, 2024, I conducted a zoom meeting with Mike Busse (CRWA). We discussed his new job position/financial assistance/grants/excel reports/SCADA/PS #1 spillage and permanent fix/Geo Technical investigation for PS #1/Radio's/EDU's, to include shut offs, EF-4 filters, and clean-outs.

On Jan 16, 2024, I completed samples for Pond #2 and #3. Also, Well's #1 and #2. Turned in said samples to SGS at Susanville's Sewer Department.
